

When and How Are Backchannels Used?: A Comparison of Japanese and English

Japan Women's University

Kaori Kobayashi

mib126rhythm@yahoo.co.jp

1. Introduction

1.1. What is backchannels?

Backchannels

```
graph TD; A[Backchannels] --> B[Verbal]; A --> C[Non-verbal]; A --> D[Co-occurrence]; B --- B1[Short messages (uh-huh, yeah), short comment (I see, Okay) (Yngve, 1970)]; C --- C1[Nods (Maynard, 1986 and Kogure, 2007)]; D --- D1[Non-verbal & verbal];
```

Verbal

Short messages
(uh-huh, yeah),
short comment
(I see, Okay)
(Yngve, 1970)

Non-verbal

Nods
(Maynard, 1986
and Kogure, 2007)

Co-occurrence

Non-verbal & verbal

1. Introduction

1.2. Previous Studies

~ Backchannel ~

▪ Comparison between Japanese and English
(Clancy et al. 1996 and Maynard, 1986 etc...)

⇒ Frequency: English < Japanese

Position: Japanese → 'in progress' of speaking

English → Grammatical Completion points, pause

©the difference among verbal backchannels alone, non-verbal backchannels alone, and co-occurrence of verbal and non-verbal backchannels in Japanese and English conversations is not revealed so far.

1. Introduction

1.2. Purpose of Study

- 1) the difference among non-verbal, verbal backchannels and co-occurrence of non-verbal and verbal backchannels
- 2) the relationship between what the speaker says and the type of backchannels the listener chooses

2. Definition

Backchannels

◎verbal backchannels

- Non-lexical utterances→They do not have particular conceptual meaning.

Ex) “*un* (yeah)” and “*hee*” in Japanese and “yeah” and “uh-huh” in English.

- Lexical utterances→They are more expressive.

Ex) “I see,” “OK,” “*sounanda* (“I see”),” and so on.

◎non-verbal backchannels

- listeners’ head nods

◎ Co-occurrence of verbal and non-verbal backchannels

3. Methodology

3.1. Data

- Mr. O Corpus
- Conversation: “what were you most surprised at.”
- familiar pair (student – student)
- 10 pair of native Japanese speakers and English speakers respectively.

3. Methodology

3.2. Procedure

① Frequency of three kinds of backchannels is examined.

② The contents of the utterance are classified into categories.

③ How often each backchannels are used towards each categories is presented.

3. Analysis

3.1 Frequency

Kind of Backchannel	Japanese	English
Non-verbal backchannels	209 (22.52%)	202 (40.32%)
Verbal backchannels	232 (25%)	155 (30.94%)
Co-occurrence of non-verbal and verbal backchannels	489 (52.48%)	144 (28.74%)
Total	930 (100%)	501 (100%)

3. Analysis

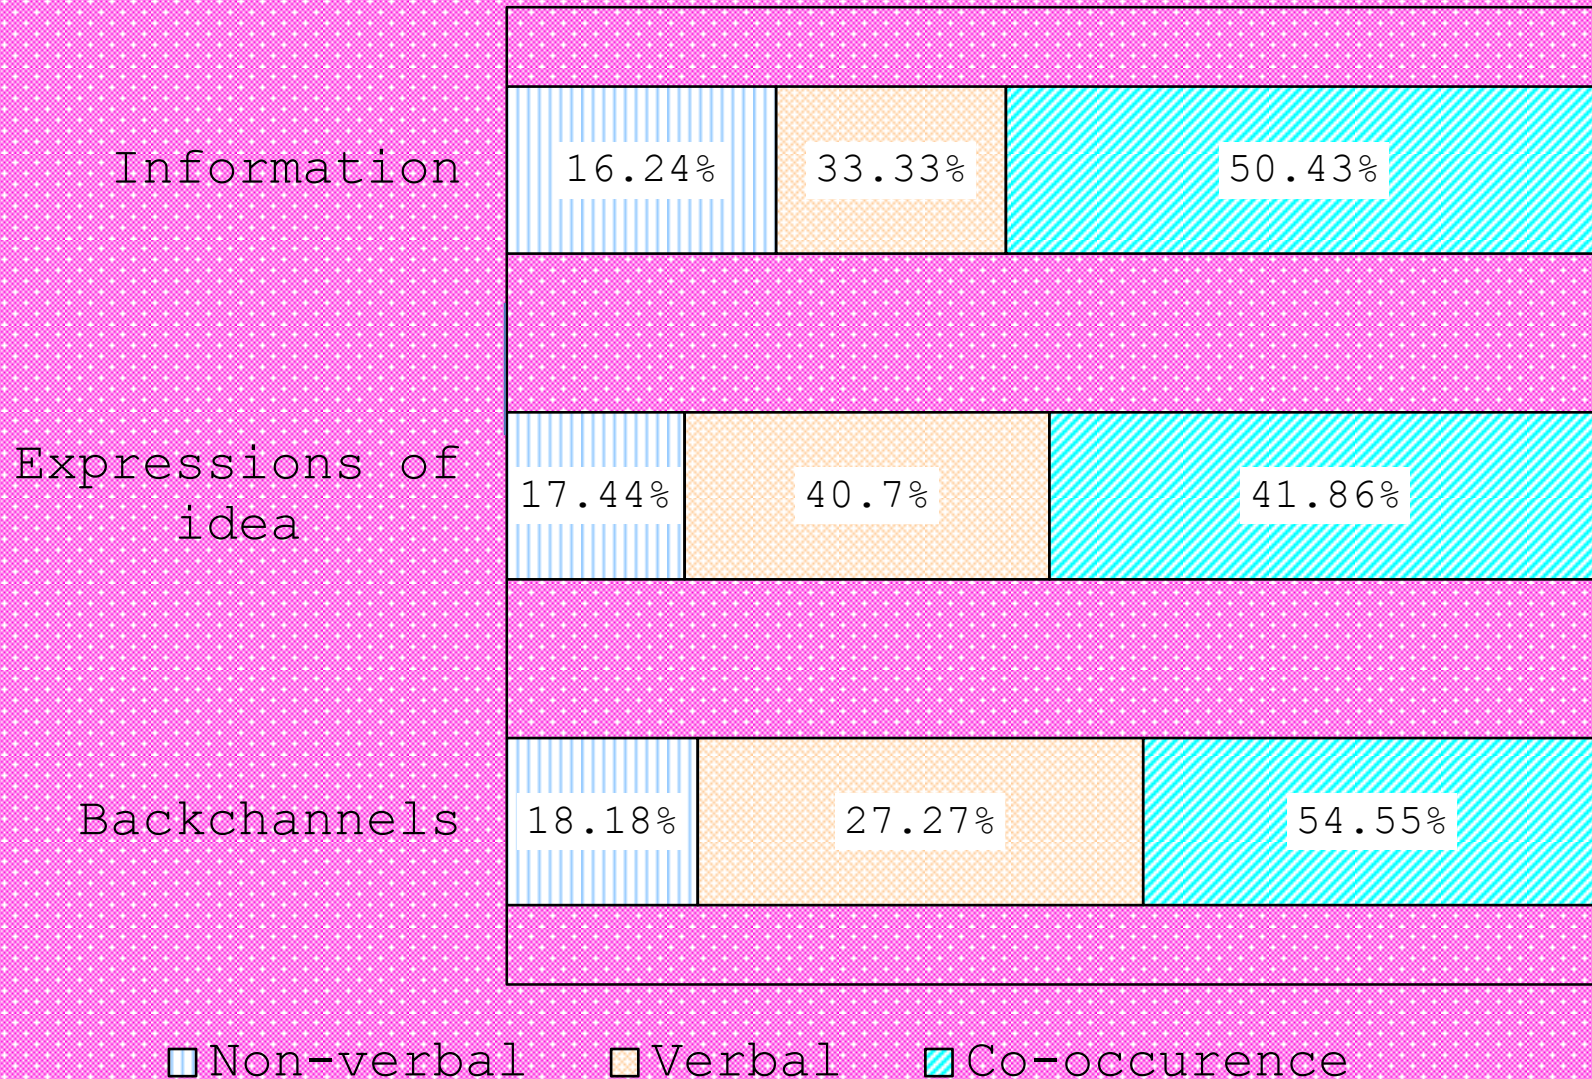

3.2 Categories of the contents of the utterances

Categories	Japanese	English
Information (objective)	658 (70.75%)	373 (74.45%)
Expressions of idea (subjective)	117 (12.58%)	88 (17.56%)
Backchannels	86 (9.25%)	22 (4.39%)
Request for agreement	55 (5.91%)	4 (0.8%)
Discourse marker	7 (0.75%)	4 (0.8%)
Hesitation*	4 (0.43%)	10 (2%)
Laughter*	3 (0.32%)	0 (0%)
Total	930 (100%)	501 (100%)

*new categories
(Szatrowski 1993)

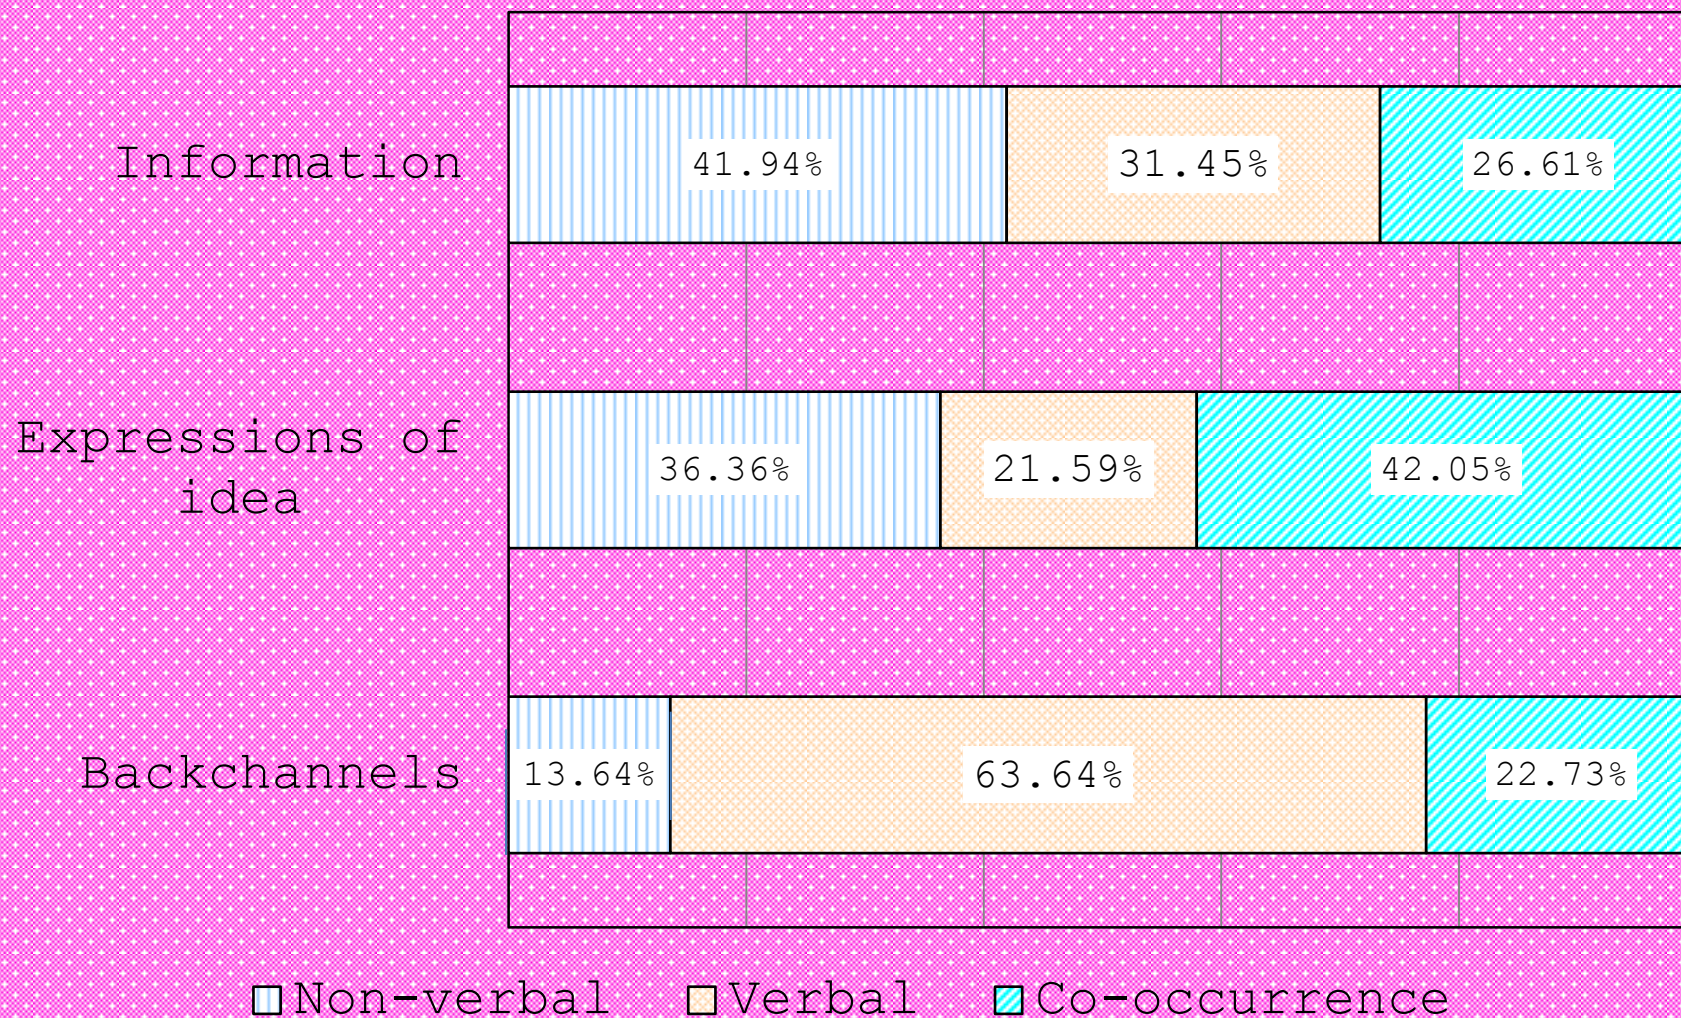

3. Analysis

3.3 Results of the Japanese Conversations

3. Analysis

3.4 Results of the English Conversations

3. Analysis

3.5.1 Categories of the contents of the utterances

- Information

~Japanese~

1 A: *Nanka watashiga kyonennona nigatsuni/ ousutoraria*

‘Well last February, I went to Australia’

→ **/(B1: H) ⇒ non-verbal**

2 *[niittandakedo] houmusuteide/*

‘for homestay, and’

→ **(B2: [A:: a:: a::]) ⇒ verbal**

‘Ah ah ah’

[H]

/((B3: [Un])) ⇒ co-occurrence

‘Yeah’

~English~

1 A: So one thing that surprised me/ is when I was/ a kid/ **[I]/**

→ **/(B1: H [H])**

2 was a teenager/ I started watching anime **[Ja]pa[ne]se [a]ni[me]**

→ **(B2: [H] [H] [H] [H])**

3. Analysis

3.5.2 Categories of the contents of the utterances

Expressions of idea

~Japanese~

1 A: *nanka omoshiroishitende miteruna:: ttehitomoirushisa*

‘well, some people have interesting points of view and’

2 *[ironna] aidhiaga atte su[goi] omoshiro::i tteiunoto*

‘There are different ideas, so I feel they are so interesting and’

→ [H] (B2: [H]) ⇒ non-verbal

((B1: [A::])) ⇒ co-occurrence

‘Ah’

3 *[bi]kkurito [arune]*

‘surprising’

→(B3: [H]) (B4: [A::] a:: a::) ⇒ verbal

⇒ non-verbal ‘Ah ah ah’

3. Analysis

3.5.2 Categories of the contents of the utterances

Expressions of idea

~ English ~

1 A: I think it's there's a lot of things in common with like

2 the/ uh/ consumerism attitude with Japan and the

3 U.S. as opposed to [li]ke p[la]c[es] in Europe where

→ (B1: [H] [H] [H]) ⇒ non-verbal

4 it's not like that/

[H]

→ /((B2: [Yeah])) ⇒ co-occurrence

3. Analysis

3.5.3 Categories of the contents of the utterances

Backchannels

~Japanese~

1 A: *Atowa::/ tyottoshitakotode bikkuriwa yokuarukedone/*

‘And I am often surprised at small things’

verbal ⇒ / (B1: *Ma:: soudayone[::]*)

‘Well I agree with you’

[H]

co-occurrence ⇒ (A1: [*Un*])

‘Yeah’

~English~

A: Cuz he was sleeping there/

/ (B1: Yeah)/ ⇒ verbal

→/ (A1: Yeah) ⇒ verbal

4. Discussion

<Japanese>

→ preference for co-occurrence of non-verbal and verbal backchannels towards each categories

⇒ react to the speakers' talk actively; visually and aurally

<English>

→ preference for non-verbal backchannels alone

→ distinguish three types of backchannels according to the contents of the utterance (The more the speakers' utterances have information, the more the listeners use non-verbal backchannels)

⇒ avoid interfering the speakers' talk

5. Conclusion

The different stance towards communication

<Japanese>

- Conversation is something that has to be constructed by the participants.

⇒ Cooperation and establishment of a social relationship with others (Kita and Ide, 2007; Maynard, 1986)

<English>

- Exchange of information and stating what the speakers want to say are important.

⇒ Independence and individualism (Iwasaki 1997)
